Hi Rosalie, thanks for getting the access. Since it sounds like you have had some intense discussions with the owners and the attorneys, I would appreciate if you wrote the letter. We have sediment sampling left to do and surface water sampling. These samples will require either walking on the property and collecting samples or launching a small boat to take some samples on the pond. If you have any more questions, please call or e-mail. Thanks, happy holidays, Sally

Sally,

Rosalie is making very good progress on the off-site access issue for Magna.

The owner of 8 Cross Road will allow access to the RP.

The owner of 14 Thrush Way will allow access, after Rosalie talked to his attorney and convinced him.

The owner of 5 Cross Road (Peekskill, NY, 10566) is a Dr. Daniel Solomon.

He wants a letter which describes the work we propose to do on his property (I thought it was just sediment sampling, but couldn't remember if we also needed GW samples). He also wants the letter to indicate that ISC Properties will be responsible for any contamination found on his property which is emanating from the Magna Metals sites.

Rosalie said that she will not be in to write this letter until Friday (the 26th) if you email her the proposed scope of work. If you would like the letter out sooner (to allow field work to proceed sooner) she said you could say in the letter that Rosalie asked you to write to him directly.

Bob
